To: Mr. Gregory Everett  
 The Auto Bolt Corporation

**Re: Testing Results for product "The Auto-Bolt " Ver. 2017**

Dear Mr. Everett,

We have received your updated version of the Auto-Bolt for testing. The Product was installed and tested on vehicle #1fd462e and Vehicle # 2cc487b. We tested your product to see how it would perform in the event of a motor vehicle collision in which emergency services personnel needed to extricate occupants from the vehicle. The factors we were looking most closely at were:

- 1) Ease of extrication
- 2) Time required
- 3) Overall complications in extrication of persons

We took our findings and compared them to a vehicle without your device installed. The Following are the results of that testing sequence:

Test	Glass Break Removal	Halligan Tool Force Pry-bar Force	Spreader Tool Force	Small Cutter (Hurst) Small Cutter (Holmatro)	Large Cutter (Hurst) Large Cutter (Holmatro)
Result	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment
Test	K-Saw	Emergency Release function on unit (Post Crash)	Normal Operation (Post Crash)	Normal Unit Release under Stress	Ability to release from External Power Source
Result	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment	Pass/No Impediment

As you can see from the above results, your unit performed exceptionally well. We did not note any substantial difference in time, ease or complications of extrication on the vehicles equipped with the Auto-Bolt product in comparison to a vehicle without the product. Furthermore, our technicians were highly impressed with the overall design and functionality of your product. As in the past, we have been very pleased with the operability of your product, with each version improving on the last and incorporating new safety features to make use of the product more efficient and safer for all parties involved.

If you have any questions please do not hesitate to contact me. Thank you for allowing us to be of service to you, we look forward to continuing to help you in the future. Best of luck with your product.

Sincerely,

*Antonio Ibarra, Jr.*
